

Lower Silurian System of Eastern Montgomery County, New York Volume 34 (Paperback)

By Edgar Roscoe Cumings

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 edition. Excerpt: .hill. Northward it gives ofi several branch faults and has been traced by the early geologists of the New York survery and more recently by Mr Darton and-Prof. Prosser to the Archaean mass northwest of Saratoga. The most interesting part however both from the standpoint of geology .and of topography is at the deep glen north of Hoffman ferry, known as /Volf s hollow, where there is an escarpment on the western side of the glen forming a mural cliff of over 100 feet in places almost perpendicular. The glen has been cut presumably by the creek which may now be seen as a diminutive stream flowing by the roadside through the glen, where the soft shales of the Utica(?) and Hudson river formations lie inclined at a high angle against the hard resisting wall of Calciferous sandrock. One: may see therefore on the...
