

## Bulletin Volume 4, Nos. 1-3 (Paperback)

By Colorado School of Mines Society

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: .The variation in steam pressure is very great; we find plants in different localities operating with pressures as low as 80 pounds and as high as 200 pounds per square inch. Other things being equal, the higher the steam pressure, the greater the economy. In connection with the subject of type of prime movers, one of the most reputable concerns in the market for feed-water heaters has said that it does not make so much difference what type of prime mover is selected as it does what type of feed-water heater. While this statement ought to be taken with a grain of salt, yet upon analysis of same with a view of the relative qualities of heat extracted from the working fluid by the two while performing their respective work with best economy, it will be seen that there is much truth in the statement.
