This collection presents many of Freud's revolutionary ideas, showing how his theories changed the way people think about their emotions and actions, opening a rich dialogue about the methods and science of the brain. In a series of essays written between 1911 and 1938, readers follow Freud through clear explanations of how neurology and psychology influence our actions and govern personality traits and emotions, including the libido, narcissism, mourning, repression, dreams, paranoia, and melancholy.
